

Drdha Q HEALTHCARE LLP
STEADFAST HEALTHCARE QUALITY SYSTEMS

WEBSITE REQUIREMENTS DOCUMENT

Drdha Q Healthcare LLP

Healthcare Quality • Audit • Accreditation • Certification Facilitation • Training

1. Executive Summary

Professional website for Drdha Q Healthcare LLP focused on healthcare quality, audit, accreditation and certification readiness. Primary audiences: hospitals, corporate hospitals, medical colleges and dental colleges. The primary conversion is an enquiry form that stores validated lead data in Google Sheets and sends an owner notification through WhatsApp.

2. Source-Based Organization Objectives

- Consultancy, advisory, assessment, auditing, implementation, training, capacity building, certification facilitation, compliance management, quality assurance, accreditation support, project management, monitoring/evaluation and related healthcare quality, governance, risk, patient safety and clinical governance services.
- Research, consultancy and technology-enabled work in climate change, environmental sustainability, carbon reduction, energy efficiency, waste management, circular economy, green healthcare, ESG, carbon footprint and net-zero initiatives for healthcare and other institutions.
- Education, training, skill development, certification, assessment, coaching, mentoring, capacity building and continuing education for healthcare professionals and support staff through physical, digital and hybrid delivery.
- Sustainable and eco-friendly product activities, including organic/natural products, bio-fertilizers, organic manure, natural farming products, green technologies and environmental solutions.
- Integrated consulting, advisory, research, training, implementation and technology-enabled solutions in healthcare quality improvement, sustainability, healthcare transformation, organizational excellence, public health, environmental management, workforce development and institutional capacity building.

The supplied Objectives document references ISO 9001:2015, ISO 7101:2023, JCI, NABH, NABL, ISO 14001, ISO 45001, ISO 27001, ISO 15189 and ISO 17025.

3. Website Goals

- Establish a credible and professional digital presence for Drdha Q Healthcare LLP.
- Clearly explain healthcare audit, quality, accreditation and certification-readiness services.
- Generate qualified enquiries from hospitals, medical/dental colleges and corporate hospitals.
- Build trust through expertise, standards, methodology, training capability and client-focused communication.
- Provide fast conversion paths through Enquiry, WhatsApp, Call and Email.
- Capture all enquiries in a structured Google Sheet for follow-up.
- Notify the website owner immediately through WhatsApp when a new enquiry is submitted.
- Provide a scalable foundation for future services, articles, training programs, downloadable resources and client portals.

4. Target Audience

Audience	Primary Need
Hospitals	Hospital management, quality managers, medical superintendents, administrators and department heads.
Corporate Hospitals	Quality, compliance, operations, clinical governance and leadership teams.
Medical Colleges	Academic leadership, administrators, quality teams and institutional management.
Dental Colleges	College management, quality/accreditation teams and academic administrators.
Laboratories / Diagnostic Organizations	Organizations seeking quality-system, laboratory-standard or accreditation support.
Healthcare Professionals	Professionals seeking training, capacity building and continuing education.
Organizations seeking ISO readiness	Organizations that need gap assessment, implementation support and certification facilitation.

5. Website Information Architecture

- Home: Positioning, key services, standards, industries, methodology, trust signals, CTA and enquiry form.
- About Us: Organization overview, mission/vision, expertise, approach, leadership/team and values.
- Healthcare Quality & Audit: Audit, assessment, gap analysis, quality improvement, compliance and governance services.
- ISO Certification Readiness: Certification-readiness journey, gap assessment, documentation, implementation, internal audit and facilitation.

- Accreditation Services: NABH, NABL, JCI and other relevant accreditation support.
- Standards & Compliance: Dedicated overview of applicable standards and compliance frameworks.
- Training & Capacity Building: Training programs, workshops, continuing education and customized institutional programs.
- Healthcare Sustainability: Green healthcare, ESG, environmental management, carbon reduction and sustainability services.
- Our Approach: Discover → Assess → Plan → Implement → Train → Audit → Improve → Certification/Accreditation readiness.
- Industries We Serve: Hospitals, corporate hospitals, medical colleges, dental colleges, laboratories, healthcare networks and other institutions.
- Resources / Insights: Articles, checklists, FAQs, guides and future downloadable resources.
- Contact Us: Address, phone, email, WhatsApp CTA, enquiry form and map.
- Privacy Policy: Data collection, purpose, retention, third-party integrations and contact details.
- Terms / Disclaimer: Website use, consultancy scope and informational disclaimer.

6. Home Page Requirements

- Header: Logo; navigation; Services dropdown; Standards; Industries; About; Resources; Contact; prominent Enquire Now and WhatsApp CTA.
- Hero: Clear value proposition around healthcare quality, audit, accreditation and certification readiness. Primary CTA: Request Consultation. Secondary CTA: WhatsApp Us.
- Trust / Expertise: Short statement describing the organization's healthcare quality, standards and audit focus.
- Services: Cards for Healthcare Audit & Assessment, ISO Certification Readiness, Accreditation Support, Quality Management Systems, Clinical Governance/Patient Safety, Training & Capacity Building, Healthcare Sustainability.
- Standards: Visual list of applicable standards. Each item should link to an explanatory page or service section.
- Industries: Hospitals, Corporate Hospitals, Medical Colleges, Dental Colleges, Laboratories/Diagnostics and Healthcare Organizations.
- Methodology: Simple 6–8 step process showing how an institution moves from current-state assessment to readiness.
- Why Choose Us: Healthcare-focused expertise, structured methodology, practical implementation, training, documentation and continuous improvement.
- Training CTA: Invite institutions to request customized training programs.
- Insights: Future-ready section for articles, audit tips, certification updates and healthcare quality insights.
- Enquiry CTA: Strong conversion block with short form and WhatsApp option.
- Footer: Logo, services, standards, contact, social links if available, legal links and copyright.

7. Service Catalogue

- Healthcare Quality Consulting: Quality-system design, improvement planning, implementation support, monitoring and evaluation.
- Healthcare Audit & Assessment: Gap assessments, internal audits, compliance assessments, process reviews and corrective-action planning.
- ISO Certification Readiness: Readiness assessment, documentation support, implementation guidance, internal audit preparation and certification facilitation.
- ISO 7101 Healthcare Quality Management: Healthcare-specific quality management readiness and implementation support.
- ISO 9001 Quality Management: Quality management system readiness and continual-improvement support.
- NABH Accreditation Support: Assessment, documentation, implementation, training and accreditation readiness support.
- NABL / ISO 15189 / ISO 17025 Support: Laboratory quality and accreditation-readiness support where applicable.
- JCI Readiness Support: Institutional readiness, gap assessment and quality/safety improvement support.
- Clinical Governance & Patient Safety: Governance frameworks, risk management, patient-safety processes and quality improvement.
- Training & Capacity Building: Healthcare quality, audit, standards, compliance, patient safety and workforce development programs.
- Healthcare Sustainability: Green healthcare, waste management, energy efficiency, ESG, carbon footprint and sustainability initiatives.

8. Enquiry Form

- Full Name — Required — Text
- Organization / Hospital Name — Required — Text

- Designation — Optional — Text
- Email — Required — Email validation
- Mobile / WhatsApp Number — Required — Country-aware phone validation
- Organization Type — Required — Hospital / Corporate Hospital / Medical College / Dental College / Laboratory / Other
- Service Interested In — Required — Multi-select or dropdown
- Standard / Accreditation — Optional — ISO 9001 / ISO 7101 / NABH / NABL / JCI / ISO 15189 / ISO 17025 / Other
- Current Status — Optional — Planning / Gap Assessment / Implementation / Certification Preparation / Renewal / Other
- Preferred Contact Method — Optional — Phone / WhatsApp / Email
- Message — Required — Textarea
- Consent — Required — Privacy/data-use acknowledgement

Form behaviour

- Client/server validation
- Duplicate submission protection
- Clear success/failure states
- Timestamp and source capture
- UTM capture where available
- Spam protection
- No secrets in client code

9. Google Sheets Integration

Recommended: secure Next.js server endpoint → validation → Google Sheets write. Suggested columns:

Lead ID, Timestamp, Name, Organization, Designation, Email, Phone, Organization Type, Service, Standard, Current Status, Preferred Contact, Message, Source Page, UTM Source, UTM Medium, UTM Campaign, WhatsApp Notification Status, Follow-up Status

10. WhatsApp Workflow

- Validate/sanitize
- Generate Lead ID
- Write to Google Sheets
- Send owner WhatsApp notification
- Update notification status
- Return success response
- Optional customer acknowledgement where supported by the selected WhatsApp setup

Owner notification template

NEW WEBSITE ENQUIRY | Lead ID: {{lead_id}} | Name: {{name}} | Organization: {{organization}} | Service: {{service}} | Standard: {{standard}} | Phone: {{phone}} | Email: {{email}} | Message: {{message}}

11. Next.js Technical Architecture

- Frontend: Next.js with responsive React UI, reusable components, accessible forms and SEO-friendly server-rendered/static content where appropriate.
- Backend: Next.js Route Handlers/API endpoints for form validation, Google Sheets integration and WhatsApp notification orchestration.
- Data: Google Sheets as the initial lightweight lead repository. Design the service layer so a database can be introduced later without redesigning the UI.
- Messaging: WhatsApp Business API/provider integration through a server-side service.
- Hosting: Deploy to a production Next.js-compatible platform. Environment variables must hold secrets.
- Email: Optional transactional email notification to the owner and/or enquiry acknowledgement.

- Analytics: Privacy-conscious analytics with conversion events for enquiry, WhatsApp click, call click and email click.
- Monitoring: Application logs, error monitoring and integration failure alerts.

12. Security & Privacy

- HTTPS/TLS; secrets in environment/secret storage; server-side validation; rate limiting; spam protection; restricted Sheet access; WhatsApp credentials server-side only; privacy policy; do not collect patient medical information through the general enquiry form.

13. UI/UX & Branding

- Use supplied logo as primary brand reference; clean premium healthcare-consulting style; mobile-first; accessible; strong CTA hierarchy; sticky mobile WhatsApp/contact controls; healthcare-quality imagery.

14. SEO

- Unique metadata; semantic headings; clean URLs; Open Graph; sitemap/robots; canonical URLs; structured data where appropriate; local SEO if intended; service-specific keyword pages; image and performance optimization.

15. Content Requirements

- Company overview and positioning.
- Mission / Vision / Values – to be supplied/approved by the owner.
- Detailed service descriptions.
- Standards and accreditation explanations.
- Methodology/process.
- Industry-specific service pages.
- Training and capacity-building offerings.
- Healthcare sustainability offering.
- FAQs.
- Client testimonials/case studies – only when approved and factually verified.
- Leadership/team profiles – owner to supply approved bios and photographs.
- Contact information and service area.
- Privacy Policy and Terms/Disclaimer.

16. Lead Management

- Google Sheets is the initial lead repository.
- Protected sheet with controlled editors.
- Lead status: New, Contacted, Qualified, Proposal Sent, Won, Lost, On Hold.
- Custom admin portal is optional for MVP.

17. Analytics

- enquiry_form_view
- enquiry_started
- enquiry_submitted
- enquiry_failed
- whatsapp_clicked
- phone_clicked
- email_clicked
- service_cta_clicked
- training_enquiry_clicked

18. Non-Functional Requirements

- Performance: Target fast mobile experience; optimize images, fonts, scripts and third-party integrations.
- Availability: Production site and lead integrations should be monitored; failures must not silently lose enquiries.
- Scalability: Service/integration layer should permit future migration from Sheets to a database/CRM.
- Maintainability: Reusable components, typed interfaces, environment-based configuration and clear documentation.
- Accessibility: Keyboard navigation, labels, focus states, alt text, contrast and screen-reader-friendly forms.
- SEO: All public service pages should be crawlable and indexable unless explicitly excluded.
- Reliability: If WhatsApp notification fails after sheet write, the lead must remain stored and the failure must be visible for retry.
- Security: No secrets in source control; validate all public input; restrict integrations.

19. Error Handling

- Website is responsive on current desktop, tablet and mobile browsers.
- All agreed pages are accessible through navigation and footer.
- Enquiry form validates required fields and invalid email/phone formats.
- Successful enquiry creates exactly one lead record in the configured Google Sheet.
- Lead contains timestamp and all approved form fields.
- Authorized owner receives a WhatsApp notification for a successful enquiry.
- WhatsApp/API failures do not delete the stored lead.

20. Acceptance Criteria

- Website is responsive on current desktop, tablet and mobile browsers.
- All agreed pages are accessible through navigation and footer.
- Enquiry form validates required fields and invalid email/phone formats.
- Successful enquiry creates exactly one lead record in the configured Google Sheet.
- Lead contains timestamp and all approved form fields.
- Authorized owner receives a WhatsApp notification for a successful enquiry.
- WhatsApp/API failures do not delete the stored lead.
- Secrets are not exposed in browser source or client bundles.
- Privacy consent is mandatory before submission.
- Spam protection is enabled.
- Basic SEO metadata, sitemap and robots.txt are present.
- Analytics events work for agreed conversion actions.
- Contact details and legal/business information are approved by the owner before launch.
- Production build passes functional, security, accessibility and performance checks.

21. Development Phases

- Phase 1 – Discovery & Content: Finalize sitemap, service catalogue, target audience, messaging, legal details, contact information and approved content.
- Phase 2 – UX/UI: Wireframes, visual design, responsive layouts, CTA strategy and form UX.
- Phase 3 – Next.js Development: Pages, reusable components, SEO foundation, responsive implementation.
- Phase 4 – Integrations: Google Sheets lead capture, WhatsApp owner notification, spam protection and analytics.
- Phase 5 – QA: Functional, responsive, browser, accessibility, performance, security and integration testing.
- Phase 6 – UAT & Launch: Owner review, content approval, production configuration, domain/DNS, monitoring and launch.
- Phase 7 – Continuous Improvement: SEO, content, conversion optimization, training catalogue, resources/blog and CRM/database integration.

22. Deliverables

- Requirements baseline, UI/UX, Next.js source, reusable components, production website, Google Sheets and WhatsApp integrations, deployment/configuration documentation, test/UAT checklist, SEO setup and owner handover guide.

23. Information Required From Owner

- Final company messaging; mission/vision/values; leadership details; service list; confirmation of standards supported; service geography; approved contact details; WhatsApp Business/API setup; Google account; legal policies; testimonials/client logos; domain/hosting; social links.

24. Suggested Messaging

Positioning

Healthcare Quality, Audit & Certification Readiness Partner

Hero options

- Strengthening Healthcare Quality. Preparing Institutions for Excellence.
- Healthcare Quality Systems, Audit & Certification Readiness.
- Building Stronger Healthcare Quality Systems Through Practical Implementation.

Primary CTA

Request a Consultation

Secondary CTA

WhatsApp Us

25. Scope Boundary

The supplied Objectives document is broader than the immediate healthcare-audit brief and also covers sustainability, education/training and sustainable products. The site should make healthcare quality/audit the primary conversion path while preserving an architecture that can accommodate the other approved objectives.
